## SUMMARY

I am a detail-oriented Automation Tester with over 3 years of experience in crafting and executing automated test frameworks. My expertise in tools such as Selenium, TestNG, and REST-Assured, combined with my Agile methodology proficiency, enables me to identify defects, enhance test coverage, and collaborate effectively with cross-functional teams, ensuring high-quality software delivery

## EXPERIENCE

### Automation Tester

Capgemini

11/2021 - Present    Hyderabad

- Designed and maintained automated test scripts using Selenium WebDriver and TestNG
- Collaborated with developers and business analysts to define test strategies and acceptance criteria
- Performed API testing using REST-Assured and Postman
- Conducted regression, integration, and smoke testing across multiple releases
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives
- Contributed to code reviews and merge request validations for QA automation scripts
- Utilized SQL for backend validation and database testing
- Reduced regression testing time by 30% through automation
- Increased test coverage from 60% to 90% by implementing comprehensive test suites
- Identified and reported 100+ bugs, contributing to a 25% improvement in product stability

## EDUCATION

### Bachelor of Technology in Computer Science

Amrita Sai Institute of Science and Technology

07/2021    Kanchikacherla

## KEY ACHIEVEMENTS

### Bug Identification and Reporting

Identified and reported over 100 bugs, which led to a 25% improvement in product stability

## SKILLS

ALM	AWS	Git	Java
Jenkins	JIRA	Manual Testing	
Maven	Postman	Python	
RDBMS	REST	Selenium	SQL
Swagger	TestNG	WebDriver	
Robot Framework			

## PROJECTS

### Precision Dispatch System

01/1970 - 01/1970    Not specified

A project focused on developing a dispatch system with advanced automation capabilities

- Developed and maintained scalable automation frameworks
- Automated REST API validations using REST-Assured
- Executed complex SQL queries for data validation
- Reported and tracked bugs using ALM and Rally
- Created and executed manual test cases for edge scenarios
- Collaborated with QA leads to baseline services and improve test coverage
- Conducted root cause analysis for identified defects and worked closely with the development team to resolve issues
